

Learning 365

From the limits of training to unlimited training

Until the beginning of the last decade, corporate training was based on direct learning in the workplace/classroom. With the companies digitization o the concept of training has evolved towards educational programs that are delivered and conducted via the Internet. Through the e-learning platform, employees can benefit from continuous and **customised** training; optimal scheduling and delivery of lessons; information sharing; time and cost savings.

Sharing

Immediate and on-demand sharing of available contents

Customized

Create a custom training program in line with personal and work commitments

Costs Effective

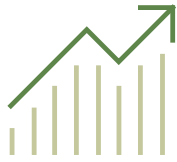

Reduction of costs compared to attending in-person classes

Learning 365 is Microsys' platform for managing information sharing and remote training via the Internet. It is an intuitive and easy-to-use platform, integrated with personal productivity tools/apps including Outlook, Onedrive, Sharepoint, Teams, and other Microsoft 365 applications. Participants can be part of **an innovative digital experience**, study and collaborate with their classroom colleagues, while remaining within their every day digital environments, both at work and at home.

Students can access pre-recorded video content, participate in discussion sessions and workgroups moderated by the instructors, view additional multimedia content, attend and participate in the training course using their own personal devices.

Trainers can use the platform to interact with learners, create personalised training courses and constantly monitor the progress of activities.

Learning 365

Facilitate change

The possibility to choose, when, where and how to attend courses.

Flexible learning environment

Participate in the proposed sessions using one's own device

Costs reduction

Cut travel costs thanks to online participation

Microsys Learning 365

1

Employees have access to an easy-to-use platform that allows them to interact actively with teachers and other trainees.

2

Each student will be able to access the courses and training documentation at any time using their own devices.

3

The company can monitor the progress of the employee training program and make modifications as needed during the delivery of the course.

4

Reduction of travel costs for both employees and teachers to be present at lessons.
