Framework 365

Manages Microsys licenses and provides utilities for licensed objects in Microsoft Dynamics 365 Business Central.

You will need this extension to get a proper license for all your Microsys favorite apps.

Framework 365 gives you a centralized panel for Microsys solution activation. You will also have at disposal two pages to check licensed and used objects inside Business Central.

Features and benefits of using this app:

- Microsys license management

- Permission range list page

- Assigned, used and free object count

Why Framework 365?

To centrally manage Microsys App licenses.

Get it now on Microsoft AppSource
